

JUST ADD DIRT

Product Review

TigerTail Pulling / Towing System

by Jeffrey Gates

The TigerTail is tucked out of the way for everyday riding.

Every now and then a new product really hits the mark, through innovation and a clear thought process a much needed tool is invented. The TigerTail by Team Tech Engineering, Inc. is one such product. It has the design and construction to last, it has simple features that don't require maintenance, and a most useful application.

The product is a retractable tow rope that mounts to the back of your quad. Its purpose is to eliminate the "find and unwind" process in getting unstuck. Just grab the hook, attach to the ORV to pull or be pulled, drive away slowly allowing the tow rope to completely extend, then "pull em out". Tension on the rope at all times eliminates the tow rope from getting wrapped around an axle during the towing operation, and when finished towing, the spool tension winds the rope on the spool. The TigerTail reduces the time

to get back on the trail by tens of minutes, and since its so quick to use, the temptation to "lift and pull" your quad out is eliminated, reducing the opportunity to injure your back. The housing surrounding the spool provides a catch to keep the tow hook in place when the TigerTail is not being used, and the whole assembly is rated for a maximum pull of 8000 pounds.

The rope is kept out of the mud while setting up and pulling.

Installation of the TigerTail is as simple as its use, Team Tech Engineering, Inc. provides complete mounting kits for a variety of different quads. The whole process is outlined in easy to understand instructions and took me less than 15 minutes to accomplish and uses no special tools. This product has increased the amount of time I spend riding on the trails, and that's what it's all about.

Visit Team Tech Engineering, Inc. at www.tigertail.us/ and tell them Just Add Dirt sent you.

Initial Impression: Dirt Worthy			90
	Compliments:	Complaints:	Score
Fitment / Installation:	Quality hardware, direct bolt-on. Easy installation.		10/10
Design/Features:	Unique, made for longevity in harsh conditions, fully functional	Not fully tested yet.	25/30
Quality:	Metal construction. Good tolerances.		20/20
Price:	Reasonable price for the added convenience, but not exceptional.		15/20
